

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0037] beginning at page 19 of the application according to the following marked up version of the paragraph:

[0037] Figures 4A-4C show example acts and steps for methods of generating and tracking undo information in accordance with the present invention. A step for processing (414) one or more change notifications for one or more changes to a user interface object within a visual user interface designer may include an act of receiving (412) one or more change notifications that are generated in response to one or more changes to the user interface object. A step for persisting (418) initial data that represents ~~and an~~ initial state of the user interface object prior to the one or more changes and subsequent data that represents a subsequent state of the user interface object after the one or more changes may include an act of (416) calling a serialization engine to serialize at least a portion of the user interface object into a serialized format that is suitable for representing the one or more changes.
